Dairy Shed Pre-Season Checks

**Is your dairy shed ready for the new season?
Ensure your dairy shed is ready when you need it.**

Operational functions we check:

- Safety systems
- Consoles
- Lighting
- Drive motors, plant centre gland (Rotary platform)
- All yard gates
- Hot water cylinders
- Switchboard components
- Milking plant motors
- Water pump motors
- Water holding tank probes and safeties
- Effluent/sludge system
- Internal and external grain systems

A complete top to bottom check of your dairy shed.

- Get preventative maintenance completed in the off-season, avoiding breakdowns during the season.
- Save time and loss in production.
- Avoid the early morning breakdowns.
- Restart your new season with confidence after the off-season.

Herringbone and rotary platform checks available.

We can also offer:

- Thermal image inspection and reporting.
- Stray voltage inspection and reporting.
- Irrigation shed inspection and reporting.
- Appliance test and tagging.
- Nairn Tap Monitor.

Communication throughout the site inspection, from initial contact, as we go. Minor issues and major problems that need attention repaired. Full report supplied on completion.
