Effluent Manager

Take the hassle out of pivot effluent distribution with the Nairn Effluent Manager.

Do you want...

- To ensure even distribution of effluent?
- To take the manual labour out of effluent distribution?
- Proof of placement and GPS mapping?

How it works:

Nairn Effluent Manager is mounted on the pivot, with GPS positioning, controlling 2-10 discharge sprinklers.

Using the Effluent Manager, the system dispenses effluent efficiently, avoiding fixed exclusion zones.

This is achieved by constantly cycling between all guns available.

HALO
SYSTEMS

What are fixed exclusion zones?

- These are areas on a farm where effluent cannot be applied from a sprinkler. These may be tracks, troughs, wet areas or anywhere you do not want effluent applied.
- Each zone has programmable start and stop degree points. There can be multiple zones programmed to one gun throughout the pivots range of operation.
- The same exclusion zones can be applied to multiple guns on the pivot at once.

"Nairn Effluent Manager is providing us reliability, allowing us to get on with our day without worrying about it and we're achieving a lot more."

We needed a good robust effluent system that would be future proof. This system provides proof of placement and control of the effluent.

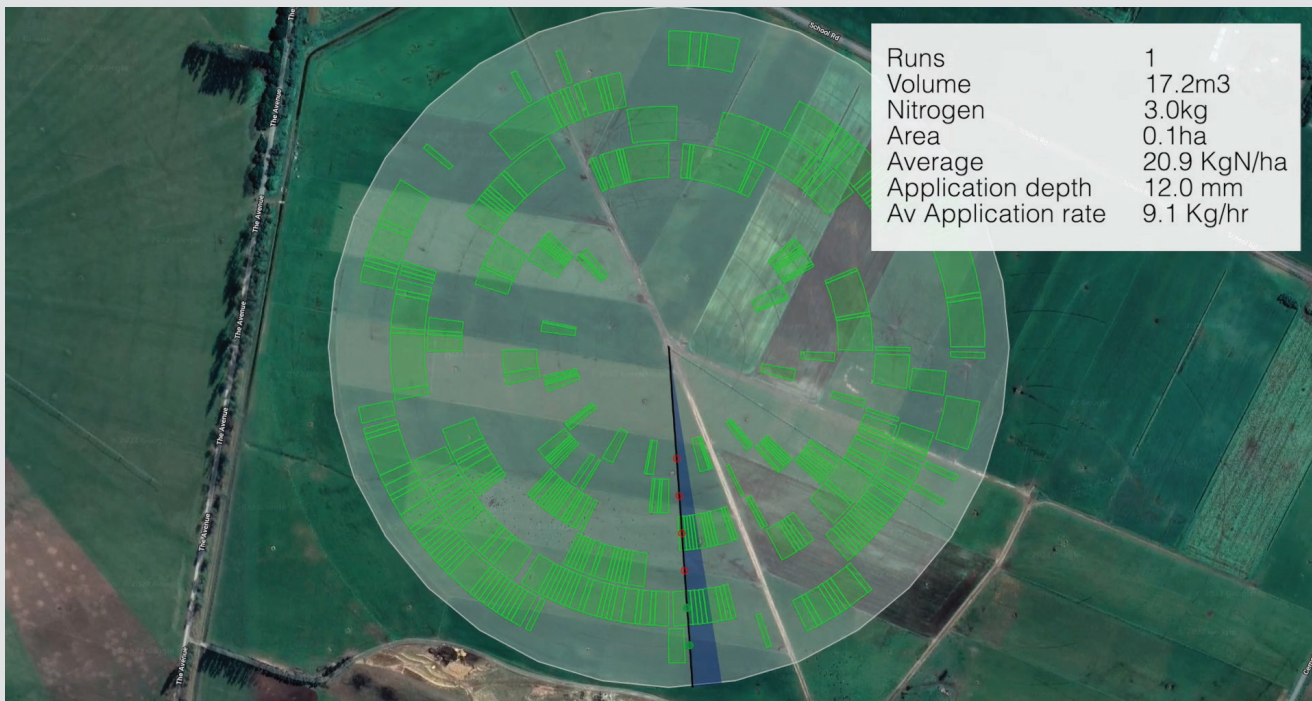

This system is really easy to use. I can just look at my phone. I can turn it on. I can turn it off. I can see exactly what's going on.

Halo Monitoring

- Proof of placement with access to reporting.
- Total nitrogen application per zone.
- Inhibit zones if programmable nitrate levels are reached.
- Total volume application per zone.
- Remote on and off control of system.
- Remote disable and enable of guns.
- Alert notifications.

Nairn Electrical have been proudly supporting rural Canterbury since 1975.

With a long track record of on-farm installation, servicing and upgrades, they not only have the electrical expertise, but understand local farms, their history and specific needs. With a 7 day a week breakdown service and a full range of preventative maintenance and productivity solutions they are the rural electrical specialists.
